

# Voluntary Product Accessibility Template (VPAT)

#### DATE: <u>August 12, 2015</u> PRODUCT NAME: <u>Intel® VTune™ Amplifier XE 2016 for OS X\*</u> PRODUCT VERSION NUMBER: <u>2016</u> VENDOR COMPANY NAME: <u>Intel Corporation</u> VENDOR SUPPORT SITE: <u>https://software.intel.com/support</u>

| Summary Table<br>Voluntary Product Accessibility Template          |  |   |
|--|--|---|
| Criteria   | Level of Support &<br>Supporting<br>Features | Remarks and<br>explanations   |
| Section 1194.21 Software Applications and<br>Operating Systems     | DOES NOT SUPPORT                             | Keyboard navigation is not<br>provided for all menu<br>commands. Many controls<br>in dialog boxes such as tabs<br>and tree controls are not<br>keyboard accessible.<br>Panels that make use of<br>complex controls and<br>graphics are not keyboard<br>accessible.<br>With the exception of<br>application menus, role,<br>state and identity<br>information is not available<br>for most controls in the<br>product interface. |
| Section 1194.22 Web-based Internet<br>Information and Applications | NOT APPLICABLE                               |   |
| Section 1194.23 Telecommunications<br>Products                     | NOT APPLICABLE                               |   |
| Section 1194.24 Video and Multi-media<br>Products                  | NOT APPLICABLE                               |   |
| Section 1194.25 Self-Contained, Closed<br>Products                 | NOT APPLICABLE                               |   |

#### **APPENDIX A: SUGGESTED LANGUAGE GUIDE**

| Section 1194.26 Desktop and Portable Computers         | NOT APPLICABLE              |   |
|--|-----------------------------|---|
| Section 1194.31 Functional Performance<br>Criteria     | SUPPORTS WITH<br>EXCEPTIONS | <ul> <li>With the exception of<br/>application menus and<br/>some controls, elements in<br/>the product user interface<br/>are not accessible to screen<br/>readers.</li> <li>There is limited keyboard<br/>access to some tabbed<br/>dialog boxes.</li> <li>The product supports the<br/>use of screen magnifiers<br/>but for some controls there<br/>is not a clear indication of<br/>current focus and focus is<br/>not exposed<br/>programmatically.</li> <li>The product's command<br/>line interface provides a<br/>textual interface for a sub-<br/>set of the product<br/>functionality.</li> </ul> |
| Section 1194.41 Information, Documentation and Support | SUPPORTS                    | Information,<br>documentation and support<br>are in compliance with the<br>requirements.  |

# Section 1194.21 Software Applications and Operating Systems - Detail Voluntary Product Accessibility Template

| Criteria  | Level of Support &<br>Supporting<br>Features | Remarks and explanations   |
|---|--|--|
| (a) When software is designed to run on a<br>system that has a keyboard, product<br>functions shall be executable from a<br>keyboard where the function itself or the<br>result of performing a function can be<br>discerned textually. | DOES NOT SUPPORT                             | Keyboard navigation is not<br>provided for all menu<br>commands. Many controls<br>in dialog boxes such as tabs<br>and tree controls are not<br>keyboard accessible.<br>Panels that make use of<br>complex controls and<br>graphics are not keyboard<br>accessible. |
| (b) Applications shall not disrupt or disable<br>activated features of other products that are<br>identified as accessibility features, where   | SUPPORTS                                     | There is nothing in the<br>product that will cause<br>disruption or disable  |

| those features are developed and documented<br>according to industry standards. Applications<br>also shall not disrupt or disable activated<br>features of any operating system that are<br>identified as accessibility features where the<br>application programming interface for those<br>accessibility features has been documented<br>by the manufacturer of the operating system<br>and is available to the product developer. |                             | activated features of other<br>products or of the<br>Operating System that are<br>Accessibility features.   |
|--|-----------------------------|---|
| (c) A well-defined on-screen indication of<br>the current focus shall be provided that<br>moves among interactive interface elements<br>as the input focus changes. The focus shall<br>be programmatically exposed so that<br>Assistive Technology can track focus and<br>focus changes.   | SUPPORTS WITH<br>EXCEPTIONS | With the exception of some<br>controls in the grid,<br>configuration dialogs and<br>dialog boxes most elements<br>in the product interface<br>provide a well-defined on-<br>screen indication of focus.<br>When focus is on some<br>controls in the grid, it is not<br>programmatically exposed<br>to assistive technology. |
| (d) Sufficient information about a user<br>interface element including the identity,<br>operation and state of the element shall be<br>available to Assistive Technology. When an<br>image represents a program element, the<br>information conveyed by the image must also<br>be available in text.   | DOES NOT SUPPORT            | With the exception of<br>application menus, role,<br>state and identity<br>information is not available<br>for most controls in the<br>product interface.   |
| (e) When bitmap images are used to identify<br>controls, status indicators, or other<br>programmatic elements, the meaning<br>assigned to those images shall be consistent<br>throughout an application's performance.   | SUPPORTS                    | The product provides<br>consistent usage of bitmap<br>and other graphical<br>elements.  |
| (f) Textual information shall be provided<br>through operating system functions for<br>displaying text. The minimum information<br>that shall be made available is text content,<br>text input caret location, and text attributes.  | DOES NOT SUPPORT            | With the exception of<br>application menus, textual<br>information is not<br>programmatically exposed<br>to assistive technologies.   |
| (g) Applications shall not override user<br>selected contrast and color selections and<br>other individual display attributes.   | SUPPORTS                    | The product does not<br>override any user selected<br>contrast or color selection<br>or any individual display<br>attributes.   |
| (h) When animation is displayed, the<br>information shall be displayable in at least<br>one non-animated presentation mode at the<br>option of the user.   | SUPPORTS WITH<br>EXCEPTIONS | Animations are used as<br>progress indicators and as<br>activity indicators. Such<br>indicators are not<br>significant for the use of   |

|   |                  | the product. The<br>information from the<br>animations is also available<br>as text, but in some cases<br>this text is not available to<br>assistive technologies.  |
|---|------------------|---|
| (i) Color coding shall not be used as the only<br>means of conveying information, indicating<br>an action, prompting a response, or<br>distinguishing a visual element.   | DOES NOT SUPPORT |   |
| (j) When a product permits a user to adjust<br>color and contrast settings, a variety of color<br>selections capable of producing a range of<br>contrast levels shall be provided.  | NOT APPLICABLE   | The product does not<br>permit user to adjust color<br>and contrast setting. The<br>product uses whatever the<br>system is set to.  |
| <ul><li>(k) Software shall not use flashing or</li><li>blinking text, objects, or other elements</li><li>having a flash or blink frequency greater than</li><li>2 Hz and lower than 55 Hz.</li></ul>  | SUPPORTS         | The product does not use<br>flashing or blinking text or<br>objects or any other<br>elements.   |
| <ul> <li>(1) When electronic forms are used, the form<br/>shall allow people using Assistive</li> <li>Technology to access the information, field<br/>elements, and functionality required for<br/>completion and submission of the form,<br/>including all directions and cues.</li> </ul> | DOES NOT SUPPORT | Forms fields in dialog<br>boxes do not provide<br>identity information to<br>assistive technologies.<br>Some form fields are not<br>reachable with the<br>keyboard alone and do not<br>provide identity<br>information. |

## Section 1194.31 Functional Performance Criteria – Detail Voluntary Product Accessibility Template

| Criteria  | Level of Support &<br>Supporting<br>Features | Remarks and<br>explanations  |
|---|--|--|
| (a) At least one mode of operation and<br>information retrieval that does not<br>require user vision shall be provided,<br>or support for Assistive Technology<br>used by people who are blind or<br>visually impaired shall be provided. | DOES NOT SUPPORT                             | With the exception of<br>application menus and some<br>controls, elements in the<br>product user interface are not<br>accessible to screen readers.<br>There is limited keyboard<br>access to some tabbed dialog<br>boxes. |
| (b) At least one mode of operation and<br>information retrieval that does not<br>require visual acuity greater than 20/70   | SUPPORTS WITH<br>EXCEPTIONS                  | The product supports the use of screen magnifiers but for some controls there is not a clear   |

| shall be provided in audio and enlarged<br>print output working together or<br>independently, or support for Assistive<br>Technology used by people who are<br>visually impaired shall be provided.  |                | indication of current focus and<br>focus is not exposed<br>programmatically.<br>The product's command line<br>interface provides a textual<br>interface for a sub-set of the<br>product functionality. |
|--|----------------|--|
| (c) At least one mode of operation and<br>information retrieval that does not<br>require user hearing shall be provided,<br>or support for Assistive Technology<br>used by people who are deaf or hard of<br>hearing shall be provided                       | NOT APPLICABLE | No Audio information or<br>operation required – No<br>information retrieval requires<br>hearing.   |
| (d) Where audio information is<br>important for the use of a product, at<br>least one mode of operation and<br>information retrieval shall be provided<br>in an enhanced auditory fashion, or<br>support for assistive hearing devices<br>shall be provided. | NOT APPLICABLE | Audio information is not<br>required for operation of the<br>product.  |
| (e) At least one mode of operation and<br>information retrieval that does not<br>require user speech shall be provided,<br>or support for Assistive Technology<br>used by people with disabilities shall<br>be provided.                                     | NOT APPLICABLE | Speech is not required for operation of the product.   |
| (f) At least one mode of operation and<br>information retrieval that does not<br>require fine motor control or<br>simultaneous actions and that is<br>operable with limited reach and<br>strength shall be provided.   | SUPPORTS       | No fine motor control or simultaneous actions required.  |

## Section 1194.41 Information, Documentation and Support – Detail Voluntary Product Accessibility Template

| Criteria  | Level of Support &<br>Supporting<br>Features | Remarks and explanations  |
|---|--|---|
| (a) Product support documentation<br>provided to end-users shall be made<br>available in alternate formats upon<br>request, at no additional charge | SUPPORTS                                     | Intel Corporation provides<br>electronic versions of all product<br>support documentation.    |
| (b) End-users shall have access to a description of the accessibility and compatibility features of products in                                     | SUPPORTS                                     | Intel Corporation provides<br>information on accessibility and<br>compatibility features upon |

| alternate formats or alternate methods<br>upon request, at no additional charge.                            |          | request at no additional charge.   |
|---|----------|--|
| (c) Support services for products shall accommodate the communication needs of end-users with disabilities. | SUPPORTS | Product support for Intel®<br>Software Development Products<br>is available in a variety of<br>formats and from a number of<br>online sources available from<br>Intel Corporation. |

#### APPENDIX A (OF THE DOS VPAT/GPAT CHECKLIST) SUGGESTED LANGUAGE FOR FILLING OUT THE VPAT/GPAT

In order to simplify the task of conducting market research assessments for procurement officials or customers, ITIC (Information Technology Industry Council) has developed suggested language for use when filling out a VPAT/GPAT. You may choose to employ all or some of the language below. Once you determine what language you intend to use, we recommend that use is consistent throughout all of your VPAT/GPATs.

#### SUPPORTING FEATURES (COLUMN 2 ON VPAT/GPAT) SUPPORTS

Use this language when you determine the product fully meets the letter and intent of the Criteria.

### SUPPORTS WITH EXCEPTIONS

Use this language when you determine the product does not fully meet the letter and intent of the Criteria, but provides some level of access relative to the Criteria.

#### SUPPORTS THROUGH EQUIVALENT FACILITATION

Use this language when you have identified an alternate way to meet the intent of the Criteria or when the product does not fully meet the intent of the Criteria.

#### SUPPORTS WHEN COMBINED WITH COMPATIBLE AT

Use this language when you determine the product fully meets the letter and intent of the Criteria when used in combination with Compatible AT. For example, many software programs can provide speech output when combined with a compatible screen reader (commonly used assistive technology for people who are blind).

#### **DOES NOT SUPPORT**

Use this language when you determine the product does not meet the letter or intent of the Criteria.

#### NOT APPLICABLE

Use this language when you determine that the Criteria do not apply to the specific product.

#### NOT APPLICABLE - FUNDAMENTAL ALTERATION EXCEPTION APPLIES USE THIS LANGUAGE WHEN YOU DETERMINE A FUNDAMENTAL ALTERATION OF THE PRODUCT WOULD BE REQUIRED TO MEET THE CRITERIA (SEE THE ACCESS BOARD STANDARDS FOR THE DEFINITION OF "FUNDAMENTAL ALTERATION").
