Your Guide to Intel Vision Content

Join us, in person or virtually, for two days of product and partner solution-driven content, leadership insights, demos, and peer-to-peer networking. Drive your business growth further than you ever imagined.
Choose your Track, Topic and Session Level.

Artificial Intelligence

AI and ML in Real-World Business Applications

You will hear from customers who are using AI to get tangible and streamlined results while lowering risk and costs and learn about the partner network providing optimized, ready-to-deploy solutions to help customers build and scale at the speed of innovation.

Data Center & Cloud

The Data Center Means Business

Hear from Intel and fellow business partners on how they've addressed workload placement, cloud computing, security, dev ops, and data analytics questions. Learn how Intel-enabled solutions and technologies unleash innovation and provide a solid foundation to address business needs today and into the future.

Environmental & Social Impact

Accelerating a Sustainable Future

Accelerating Sustainable Future sessions will cover environmental and social impact topics and technology solutions that can drive business value. Hear from customers and partners who are collaborating with Intel to lower carbon footprints, drive diversity, equity and inclusion throughout their companies and utilize technology to empower employees and customers.

Intelligent Network & Edge

Boundless Opportunity at Every Edge

Join Intel and partners as we showcase how open, software-defined, and programmable networks and edge-native platforms are driving transformation and delivering boundless opportunities to a wide variety of businesses at every edge.

Modern Client Computing

Unlocking New Business Opportunities

In the new, hybrid work environment, computing needs have changed drastically. Learn how you can empower your organization from banking to hospitality, retail to life science, to increase productivity, collaborate globally and securely, and scale innovation using Intel vPro® Platform, 12th Gen Intel® Core™ Processors, and more.

Open Ecosystem & Software Solutions

The Open Ecosystem: The Key to Innovation and Growth

Join us as we discuss how Intel's commitment to open development empowers you to rapidly monetize your products, build on a foundation of transparency and reliability, insulate from risk and enable secure, performant solutions across every layer of the stack.

Security

Security Begins with Intel®

Intel security technologies help you protect device integrity, safeguard data, detect new software threats, increase trust from edge-to-cloud, and comply with global regulations. Join us to learn how the unified force of Intel and our ecosystem partners help protect your business from tomorrow's advanced threats.

Vision for the Future

Vision for the Future: Pioneering the Next Wave of Business Opportunities

Top researchers from Intel Labs, entrepreneurs from Intel Ignite, leaders from Intel Foundry Services, and academic partners come together to preview nextgeneration business solutions in AI, security, and cloud computing.

Business Insights

Dive into the next generation of business with Intel and its partners during sessions that unlock value, deliver solutions and reveal the tools that are powering an innovative and immersive future.

Sessions

These sessions provide attendees with knowledge of a specific focus area and are offered at various levels of learning. Focusing on these industries: Modern Computing, Intelligent Network & Edge, Data Center/Cloud, AI/ML, Open Ecosystem and Software Solutions, Security, Innovation for the future.

Session Levels

100 Level
Strategy sessions discussing industry trends, professional development, or basic product overviews & introductions. No prior knowledge is required.

200 Level
Strategy sessions discussing specific products or solutions, use cases, and solutions. These sessions will also include technical content.
Prior knowledge of product and/or solution recommended.

300 Level
Highly interactive business strategy sessions discussing specific industry challenges, use cases, and solutions. These sessions would require attendee participation in discussions, breakouts, problem-solving modules, etc. Prior knowledge of product and/or solution recommended.
